Sea monsters

New Vocabulary

7.1

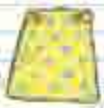

little

an octopus

a pocket

spotted

Useful Language

collect
disappear
scream
several

1. Listen and read. Draw lines.

7.2

One beautiful summer afternoon, Sue, Jill and their mum went to the beach. The sky was blue and it was very warm. Mum was sitting on the sand, writing messages on her mobile phone. There was a problem at Mum's work and she had to send several texts.

Jill was standing in the sea, watching the little fish in the water around her feet. Sue was walking along the beach. She was collecting pretty shells and putting them in her pockets. She wanted to make a necklace with them.

Suddenly, Jill screamed.

'What's the matter?' said Mum, and she ran to Jill. Sue started to run too.

1. Mum	• was collecting pretty shells	•	• when she screamed.
2. Sue	• was watching little fish in the sea	•	• when Jill screamed.
3. Jill	• was sitting on the sand	•	
	• was walking along the beach	•	
	• was sending texts	•	

2. Now say the sentences.

7.3

Mum was sitting on the sand when Jill screamed.

3. Listen and read. Complete the sentences. Use the words in the boxes.

7.4

'Look! In the water!' screamed Jill. 'It's a sea monster!'

Jill took her mum's hand and ran back to the beach. Sue wanted to see the monster. She walked into the water and looked down. 'Wow!' she said. She was looking at a sea animal with eight legs. It had a round, yellow-and-brown spotted body. It was swimming slowly under the water. Sue laughed. 'That's not a sea monster! Mum, Jill, come back!' Mum and Jill walked carefully back to Sue. 'What is it?' Mum called.

'It's an octopus,' said Sue. 'We're really lucky to see it. They usually sleep in the day and come out at night. We learnt about them in our science lessons.'
Mum and Jill looked at the animal. 'That's an octopus?' said Jill. 'It looks really strange.' She put her hand in the water and tried to feel the octopus. Suddenly, the water went black and the octopus disappeared. Jill screamed again.

'It's OK,' said Sue. 'They do that when they're afraid. When they make the water black, bigger fish can't catch them. Isn't that clever?'

'No,' said Jill. 'They're not clever. They're not amazing. They're just strange and horrible. I want to go home!'

'That's because you're afraid,' said Mum. 'Look. There's a man selling ice creams, let's ...' But before Mum could finish, Jill was running down the beach to the ice cream man.

running ~~standing~~ swimming trying

disappeared looked ~~screamed~~ walked

1. Jill was _standing_ in the water when she _screamed_.
2. Mum and Jill were _____ away from the sea when Sue _____ into the water.
3. The 'sea monster' was _____ slowly when Sue _____ at it.
4. Jill was _____ to feel the octopus when it _____.

Grammar

I / He / She / It **was**	**sitting** on the beach **when** Jill scream**ed**.
You / We / They **were**

the beginning
end

4. Listen to Sam and Sue and put the pictures in order.

7.6

a

b

1

c

d

5. Ask and answer the questions. Use the words in the box.

follow the other people to the exit	make a lot of noise
try to find the sweets	watch the beginning of the film

1. What were Jill and Sue doing when Jill fell over?
2. What was Sue doing when she hit her head?
3. What was the monster doing when Jill started to cry?
4. What was Sue doing when money fell out of her pocket?

7.7

What were Jill and Sue doing when Jill fell over?

They were following the other people to the exit when Jill fell over.

6. What were the children doing when Max disappeared? Ask and answer about Picture 1.

7.8

What was Sam doing when Max disappeared?

Sam was swimming when Max disappeared.

7. Now ask and answer about Picture 2. Use the words in the box.

call 'Max!'	fly over the sea	look in the sea
sit on a box	speak on the phone	

7.9

Who was speaking on the phone when Sam found Max?

May was speaking on the phone when Sam found Max.

Grammar

What was Sue do**ing** **when** Jill fell over?
What were Sue and Jill do**ing** **when** Jill fell over?

Now go to Workbook page 61

New Vocabulary

7.10

a bin

full

rubbish

a smell/smelly

8. Look at the pictures and read. Write one word in each gap.

Rubbish on the beach is terrible! It makes the beach _____ and smelly.

Broken bottles and old metal make the beach _____ for children to play on.

Birds and animals sometimes eat plastic rubbish, and it makes them very _____.

Rubbish on the beach makes me very _____! What can we do about it, everyone?

9. Now listen and check your answers.

7.11

10. Read and say what the children did.

Today, Mr Lee took us to the beach and we put lots of rubbish in the bins. Now the bins are full and the beach is cleaner!

1. the beach: untidy → tidier
2. the beach: dangerous for children → safer
3. the birds and animals: ill → safer
4. Mr Lee: unhappy → happier

2.12

The rubbish made the beach untidy.

The children put the rubbish in the bins and made the beach tidier.

What makes you tired?

2.13

Playing football makes me tired.

Grammar

Rubbish on the beach **makes** it a dangerous place.
The rubbish on the beach **made** me unhappy.
The children **made** the beach safer for birds and animals.

Now go to Workbook page 63

It's our world!

1. Can you think of any interesting fish or other animals that live in the sea? Tell the class about these animals.

2. Read the text. Write short answers to the questions.

7.14 *Hi! I'm Joe. I live in Cairns, Australia, near the Great Barrier Reef – the biggest coral reef in the world. A reef is made up of very small sea creatures, all living together. Lots of bigger fish and other sea animals live on the reef.*
I go snorkelling to look at them.

I like stories about sea monsters, but I think the real sea creatures of the reef are more exciting. Some are beautiful and colourful, but some are strange. Did you know that some fish have chemicals in their bodies that make them light up? This could be to frighten other fish that want to eat them, or to help them find other fish like themselves.

The box jellyfish in this photo looks beautiful, but it is also dangerous. You mustn't touch it. It can sting you when it is frightened, and this can make you very ill.

1. What does Joe do to look at the fish on the reef?

   He goes snorkelling.

2. What makes some fish light up?

   _____

3. Which creature does Joe say is dangerous?

   _____

4. What can happen if a box jellyfish stings you?

   _____

3. Read the text. Answer the questions.

7.15 My favourite sea creatures are dugongs. They live in the sea around Australia. Hundreds of years ago, sailors thought that dugongs were people who lived under the water and sang songs to the ships that sailed past them. Today we know more about them. They are a bit like dolphins, but they have big noses that point down and look like elephants' trunks. Dugongs live in the sea and eat seagrass, but they are not fish, so they have to put their noses out of the water to breathe. Sometimes they stand up on their tails to do this! Baby dugongs often ride on their mothers' backs.

Perhaps people will discover more animals in the future. There might be lots of amazing sea creatures in the deep parts of the ocean that we don't know about yet!

1. What did sailors think about dugongs in the past?
2. Which two animals does Joe say are like dugongs?
3. What do dugongs eat?
4. Why do dugongs have to put their noses out of the water?
5. Which part of a dugong's body helps it to stand up and put its nose out of the water?

4. Talk to a friend. Then tell the class.

1. What is your favourite sea creature? Why?
2. What do you think is the strangest sea creature? Why?
3. Why do you think it is difficult to explore under water?
4. What do you think the creatures in the deepest parts of the sea might be like?

New Vocabulary

6.4

burnt

Useful Language

do you mind?
hurry
normal

4. Read and complete the answers to the questions.

It was a normal evening at Sue's house. Sue and Jill were watching TV. Sue's mum was cooking dinner, but she was hurrying and things were going wrong.

'What's wrong, Mum?' asked Sue when she and Jill went into the kitchen. 'It's already 7 o'clock and we haven't had dinner yet,' said their mum. 'I wanted to make some pasta with tomatoes, but the tomatoes are too hard to use. So then I started to make some burgers. Then my phone rang and I cooked the burgers for too long. Now they're too burnt to eat. It's too late to start cooking something else now! It will soon be your bed time!'

'So what can we eat?' asked Jill.

'Some eggs,' said Sue's mum. 'Eggs are quick to cook.'

'But look at the date on the egg box. These eggs are too old to eat!' said Sue.

'Oh no!' said Mum. 'I haven't got anything else to cook. And I'm too tired to go shopping now. We'll have to go out to a café. Do you mind?'

Sue and Jill looked at the hard tomatoes, the burnt burgers and the old eggs. Then they both said together, 'No, we don't mind, Mum!'

1. What was the problem with the tomatoes?

   They were too hard to use.

2. What was the problem with the burgers?

   They were too _____ to _____.

3. Why was the time a problem?

   It was too _____ to _____ cooking something else.

4. Why didn't Sue's mum buy some more food?

   Because she was too _____ to _____ shopping.

Grammar

It was **too** late **to** eat dinner.
They were **too** tired **to** go shopping.

5. Look, read and circle the correct answer.

1. Is Jill tall enough to go on Wind Rider?
   a. Yes, she is.
   b. No, she's too short to go on Wind Rider.
2. Is Sue tall enough to go on Wind Rider?
   a. Yes, she is.
   b. No, she's too short to go on Wind Rider.

6. Ask and answer the questions.

1. Are you old enough to drive?
2. Are you old enough to ride a bike?
3. Are you old enough to have a job?
4. Are you short enough to stand under a table?
5. Is the weather dry enough to play outside today?
6. Is your classroom warm enough to sit in without a sweater?
7. Is your playground big enough to play football in?

Grammar

Are you old **enough** to drive, Pat?
Are you old **enough** to drive, Katy?

No, I'm **too** young **to** drive.
Yes, I'm old **enough** to drive.

Now go to Workbook page 69

It's our world!

1. Answer the questions.

1. What do you think you have to do to look after plants?
2. Have you ever grown vegetables or fruit at home? Who taught you how to grow them?

2. Read and circle *Yes* or *No*.

2.10 *Hello! My name is Karen and I live in Reykjavik, in Iceland. Here's a photo of my pepper plants. In Iceland, it is too cold to grow them outdoors, so I am growing them in a room in our flat.*

I have to look after my pepper plants very carefully. I'm growing them next to the window so that they have enough sunlight. Peppers usually grow in hot countries, so I have to make sure I keep them warm. The room has to be between 21°C and 27°C for them to grow well. I give my plants some water every week. It's important not to give them too much water. If plants get too much or too little water, they die. Sometimes I give them a little bit of plant food, too. They don't need much of this. When the summer comes, I will have lots of peppers to cook for my family!

1. Karen's pepper plants are growing outside her flat. Yes / (No)
2. Karen's pepper plants grow well when the temperature is more than 27°C. Yes / No
3. Karen gives her pepper plants some water and a lot of plant food. Yes / No
4. In winter, Karen's plants will give her lots of peppers. Yes / No

3. Read the text. Answer the questions.

Iceland is an island near the Arctic Circle. We have cold, dark winters and our summers are short. This makes it difficult to grow plants outdoors.

It is expensive to bring food here by plane or boat from other countries, and it uses a lot of energy, too. So our farmers grow fruit and vegetables indoors in large greenhouses. These are glass buildings where plants can grow when it is too cold or windy outside.

Iceland is quite a cold country, but we have places where heat comes up from the middle of the earth and makes the water in the ground hot. This is called geothermal energy. Farmers use this heat to keep the greenhouses warm. They also use special lights to help the plants grow in winter, so we can have fresh fruit and vegetables to eat at this time of the year, too.

1. What are the problems for people who want to grow fruit and vegetables outdoors in Iceland?
2. What are the problems in bringing food to Iceland from other countries?
3. What are greenhouses?
4. What is geothermal energy? How do farmers in Iceland use it?

4. Talk to a friend. Then tell the class.

1. Have you ever seen a greenhouse? Where? Describe what you saw inside.
2. What is good about growing your own fruit and vegetables? What might be some of the problems?
3. Do you think it's a good idea to bring food from other countries? Why?

a hostel

Useful Language

north
see you soon!

4. What does Molly think of the hostel? Read and draw lines.

To	Mum
From	Molly

We're having a great time in London, Mum! We're staying at a hostel in north London. I like the hostel, but there are a few problems. I'm in a bedroom with five of my friends. It's a nice room, and the beds are fine, but there are only two cupboards to put all our things in. So the ro[illegible]'s real[illegible]untidy. [illegible]diffic[illegible]t to have a shower. The bathrooms are clean and look great, but there are only a few showers. So we have to wait a long time for a shower in the morning. We have breakfast at the hostel restaurant. The food is amazing. We all sit at tables, and the waiters bring us big plates of food with bread, eggs, beans and tomatoes on them. But I don't want all that food – I can never finish it. And they only give us a little fruit juice in glasses. I always want more.

One other thing is that it's really busy here this week. There are about 100 students from different cities staying here, so it's really noisy and difficult to move around in the hostel. In the evening we watch TV or play games. When we want to watch TV, we have to go to the TV room early because there aren't many chairs there. Some people have to sit on the floor. There's a games room next to the TV room. It's really nice, with lots of good games, like table football, to play.
See you soon!
Lots of love,
Molly

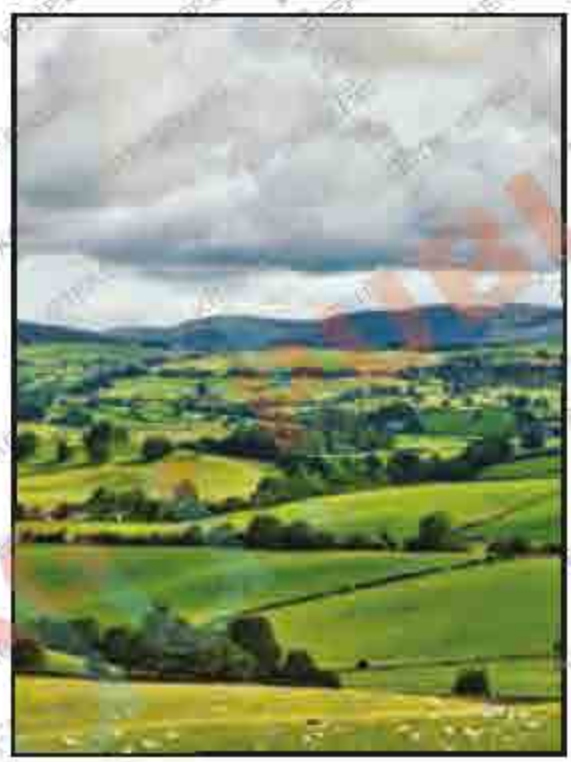

1.	There aren't enough	• chairs in the TV room.
2.	There aren't enough	• fruit juice in the glasses at breakfast time.
3.	There is too much	• food on the plates at breakfast time.
4.	There isn't enough	• showers in the bathroom.
5.	There are too many	• students at the hostel.
6.	There aren't enough	• cupboards in the bedroom.

Grammar

There aren't enough cupboards in the kitchen.
There isn't enough food for lunch.

5. Look at the photos. What do you think about cities and the countryside? Talk to a friend.

To talk about things you don't like, use ...

There is too much ...
There are too many ...

There isn't enough ...
There aren't enough ...

It's too (noisy).
It's not (quiet) enough.

To talk about things you like or don't mind, use ...

There is / are a lot of ...
There isn't / aren't a lot of ...

There isn't (very) much ...
There aren't (very) many ...

There is a little ...
There are a few ...
There are many ...

It's very (big).

9.0

I think there is too much smoke and dirty air in cities.

I think there are a lot of things to do in cities.

Now go to Workbook page 77

New Vocabulary

9.7

fog/foggy

a swan

a view

Useful Language

south
west

6. Listen to Robert and Molly and write the letters under the correct photos.

9.8

Hyde Park

d

Camden Market

The London Eye

7. Use the words in the boxes to say complete sentences.

Hyde Park Camden Market The London Eye	is the place where	a man played some amazing music in the street. Molly gave the swans some bread. Molly went riding. Robert bought a delicious ice cream. they had to wait for an hour. too many people were in the street.

Hyde Park is the place where Molly went riding.

8. Look at the pictures, choose a place and describe it to your friend. Let your friend guess what it is.

This is a place where you buy meat, fruit and vegetables.

A supermarket!

Grammar

Hyde Park is **the place where** Molly went riding.
It's **a place where** you buy meat, fruit and vegetables.
It's **the street where** a man played some amazing music.
Coco Island is **the place where** the children went for a picnic.

It's our world!

1. Answer the questions.

1. What are the most interesting places in your country? Why do people like visiting them?
2. Which places would you take a visitor to your town or city to see? Why?

2. Read the text. Answer the questions.

9.11 *Hi, I'm Fairus. I live in George Town on Penang Island in the north-west of Malaysia. Malaysia is different from most countries because it is in two parts, separated by the sea.*

There are lots of interesting places to visit in my country. Visitors like to visit the capital city, Kuala Lumpur, for its interesting buildings, shops and restaurants. They also like to see the different kinds of landscape and wildlife in our country. Malaysia is unusual because it is one of the few 'megadiverse' countries in the world. This means we have many more different kinds of animals, plants and insects than most other countries. We have about 210 different kinds of mammals, 620 species of birds and 150 species of frogs. We also have thousands of different species of insects.

1. Which two things does Fairus say make Malaysia unusual?
2. What do visitors to Malaysia enjoy?
3. Which word means that a country has a lot of different kinds of living things?
4. Which are the four different kinds of living things Malaysia has a lot of?

3. Read and circle *Yes* or *No*.

p.12

Today my class is visiting a butterfly centre near my home to learn about some of the amazing insects that live in Malaysia. The people here are trying to protect endangered species of butterflies and teach visitors about these beautiful creatures. The butterflies at the centre live in big enclosures. You can walk around the enclosures and, if you stand still, the butterflies sometimes sit on you.

We learnt about butterflies' lives from the people at the centre. Butterflies lay eggs, and after a few days, caterpillars come out of the eggs. A caterpillar has lots of legs, but no wings. It eats leaves. When it is big enough, it hides under a leaf or a branch and stays very still. Its body starts to change shape very slowly. Then one day it opens its wings, and you can see that it is now a butterfly! At the centre, we watched some butterflies opening their wings for the first time. It was amazing!

Caterpillars coming out of eggs

1. Some species of butterflies are endangered. (Yes) / No
2. The butterflies at the centre live in the open. Yes / No
3. Butterflies sit on visitors who move around a lot. Yes / No
4. Caterpillars can fly. Yes / No
5. At the butterfly centre, Fairus saw butterflies laying eggs. Yes / No

4. Talk to a friend. Then tell the class.

1. Would you like to visit a butterfly centre? Why?
2. Why do you think butterflies need to be protected?
3. Why are insects important to people, plants and animals?

Now go to Workbook pages 80–81

10.9

KITEP.EDU.KG PUBLIC

9. Read about the school garden. Ask and answer the questions.

Our School Garden

by May

Four months ago our school garden was a sad place where no one wanted to go. There weren't any flowers there and there was rubbish on the ground and in the pond. You also couldn't see any birds or animals there.

What was the school garden like before?

After we joined the new Science Club, we started a special project with Mr Payton to make the school garden into a beautiful place. We cut and tidied the plants that were already there. We picked up the rubbish from the ground and took the rubbish out of the pond. It took us two months to make the garden clean and tidy.

Why did the children need to improve the school garden?

Next, we wanted to improve the garden to make it better for insects, birds and animals. We wanted to watch them to learn more about science and the natural world. We decided to buy more plants, flowers and trees, but we didn't have any money. We thought of some ways to get money. We had a race around the town centre. There were a lot of people in the town who enjoyed running and they gave the school money to run in the race, too. A lot of people came to see the race, too. It was very exciting.

Where do you think the frogs live in the garden?

How did the children get money to buy plants for the garden?

Why did the children enjoy eating in the garden?

I baked some cakes to sell. Sue painted some pictures and sold them. Sam tried to sell some of his spiders to people! After a month we had enough money for the school garden. After another month of hard work, our garden was ready.

Yesterday we had a picnic in the garden. We really enjoyed it. We could hear frogs and birds. There were fish in the pond and lots of butterflies on the new flowers. Our school garden is now a wonderful place, and we must all look after it.

What do you think the children should do to look after the garden and keep it nice?

10.10

What was the school garden like before?

The school garden was ...

Now go to Workbook page 87

It's our world!

1. Look at the photo. Who are these people? What are they doing?

2. Read and complete the sentences.

10.11 *Hello, I'm Siti. I live in Iringa, in Tanzania. After school and university, I want to work as a scientist. Scientists understand the world by looking at it carefully and noticing things. If scientists see something unusual, they ask questions about it. Then they do experiments to check their ideas. Sometimes the experiments show that the scientists' ideas are correct. And sometimes the experiments don't work. This tells the scientists which ideas are not correct, and they learn more about the world.*

Here is a picture of Isaac Newton, one of the most famous scientists in history. He noticed that an apple always falls in a straight line from a tree to the ground. He then studied the way things fall and saw that the earth pulls objects towards it. He called this gravity. He also studied light and learnt a lot about rainbows.

1. Siti wants to be a scientist when she grows up.
2. Scientists ask _____ about things they don't understand.
3. Scientists can test their ideas by doing _____
4. Apples fall from trees to the ground because of _____
5. Isaac Newton learnt about rainbows by studying _____

3. Read the text. Answer the questions.

10.12 It's not just famous grown-up scientists who can notice and question unusual things. Erasto Mpemba went to school here in Iringa. One day in 1963, 13-year old Erasto and his friend were making ice cream. Erasto first heated some milk and sugar together until they were almost boiling. Then he put his hot milk mixture in the freezer next to his friend's cold milk mixture. One hour later, Erasto's ice cream was ready to eat, but his friend's ice cream was still too soft. The hot sugar-and-milk mixture froze faster than the cold one. Erasto then tried freezing hot water and cold water at the same time. Again, the hot water froze first. Erasto asked a scientist called Denis Osborne why this happened. Dr Osborne tried the experiment himself, but he could not answer the question. Scientists are still trying to understand why hot liquids sometimes freeze faster than cold ones. They call it the Mpemba Effect.

1. How was the mixture that Erasto put in the freezer different from his friend's?
2. Whose ice cream froze more quickly?
3. What is the Mpemba Effect?
4. Who did Erasto go to to understand the effect? Did he get his answer?

4. Talk to a friend. Then tell the class.

1. Do you like science? Why?
2. Have you ever noticed something unusual? What was it? What can you do to understand it?
3. Why might some people want to understand the Mpemba Effect?

Revision unit 2

1. Read Sue's diary and write *Yes* or *No*.

Thursday evening, 17th June

This morning, before school, I helped Mum clean our bathroom and kitchen and she gave me some money. I was very happy because I had enough money to buy the new camera that I have wanted for six months. I haven't spent any money since December.

After school, Mum and I went to town by bus. We went straight to the camera shop and bought the camera.

Friday afternoon, 18th June

I took my camera to the school garden this morning. I took a photo of two butterflies which were flying over the pool. Then I took a photo of Sam when he was sleeping under a tree. He didn't hear me! I also took a photo of May when she was taking leaves out of the pool. Then a bird came to Bill's hand to take some food from him. I took a photo of Bill because he looked afraid of the bird! Mr Lee was also in the school garden. He was trying to plant some flowers. Mr Lee's new robot was following him. Mr Lee asked the robot to help him, but it tried to put the flowers into Mr Lee's mouth. I took a funny picture of them.

Saturday evening, 19th June

I'm going to put a few of my photos on my dad's computer later tonight, so I can email them to my friends. I hope the photos are good enough to put up on my bedroom wall, too.

1. Sue spent all her money six months ago. No
2. Sue had enough money to buy a camera on 17th June. _____
3. Sue took some photos in the school garden on 17th June. _____
4. Sue took a photo of butterflies when they were flying over a pool. _____
5. Sam was asleep when Sue took a photo of him. _____
6. Bill was afraid because Sue took a photo of him. _____
7. Sue took a photo of the robot and Mr Lee. _____
8. Sue is going to send some pictures to her friends. _____

2. Sue and her dad are looking at Sue's photos. Listen and circle the correct answer.

R2.1

1. Sue: Oh dear! Here's the pool, but where are the butterflies?
   Sue's dad: a. They're too small to see.
   b. They're behind a plant.
   c. They didn't come to the pool.

2. Sue: Look at the picture of Sam! What did I do wrong, Dad?
   Sue's dad: a. There wasn't enough light for the photo.
   b. Taking a photo stopped Sam from getting up.
   c. Sam's clothes were too dark for a good photo.

3. Sue: This photo of Bill is better, but we can't see Bill very well, can we?
   Sue's dad: a. No, we can't. There wasn't enough light for the photo.
   b. Yes, we can. The photo of Bill is very clear.
   c. No, we can't. There were too many birds.

4. Sue: And look at Mr Lee! Why did the robot pull up the flowers?
   Sue's dad: a. Mr Lee didn't tell the robot what to do.
   b. The robot isn't clever enough to understand Mr Lee.
   c. The robot likes flowers a lot.

5. Sue: Is there too much sky in this picture of May?
   Sue's dad: a. There's something wrong with your camera.
   b. You were standing too far away.
   c. There's a problem where May is standing.

3. Pretend to be Sue and her dad. Ask and answer the questions from exercise 2.

R2.2

Oh dear! Here's the pool, but where are the butterflies?

They're too small to see.

4. Listen, read and write the missing words.

R2.3

Would you like to be a better photographer?

Come to the Holiday Camera Club! For children from eight to (1) twelve years old, Holiday Camera Club is free!

Day (2) _____

Time: 3:30 p.m. to (3) _____

Starts on (4) _____

For (5) _____ weeks

Come and learn to:

- take photos of (6) _____ in our town (meeting 1)
- take pictures of animals and (8) _____ (meetings 3 and 4)
- make photos (9) _____ and more beautiful
- take photos of (7) _____ you know (meeting 2)
- put your pictures on your computer
- send photos by email and look after cameras

And remember! It's not a (10) _____ if you haven't got a camera – you can use the school cameras.

5. Read and draw lines.

1. If you come to the Holiday Camera Club,
2. If you haven't got a camera,
3. If you're nine years old,
4. If the weather is sunny,
5. If you go to the Holiday Camera Club,

- you'll learn how to take pictures of buildings.
- you don't need to bring any money with you.
- you're old enough to be a member of the Holiday Camera Club.
- members take pictures of animals at the beach.
- the school has a camera that members can use.

6. Ask and answer. Use *can't* and the words in the boxes.

Sue / buy camera?
expensive / enough money

Sue's mum / take Sue / club?
busy / enough time

Sue / take pictures / butterflies?
small / near enough

Sue / use / dad's computer?
too much work / too many photos

R2.4

Why can't Sue buy the camera?

Because it's too expensive and she hasn't got enough money.

7. Give Sue advice and suggestions to help her with her problems. Use *should* and *could*.

R2.5

What should Sue do about the first problem?

Sue could do jobs for her mother to get some money. And she should save her money to buy the camera.
